SUMMARY

Full Stack Developer with expertise in **React.js**, **Node.js**, **Express.js**, and **MongoDB**. Proficient in building authentication systems, REST APIs, and database-driven web applications, with a solid foundation in Data Structures and OOP. Eager to leverage my skills in a dynamic development environment.

SKILLS

Programming Languages: JavaScript, C++, Python, SQL

Web Development: React.js, Node.js, Express.js, MongoDB, Bootstrap, Tailwind CSS, Firebase

Software Development Tools: Git, GitHub, VS Code, TestRail, Playwright (Basic)

Core Concepts: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), REST APIs

Machine Learning: Scikit-learn, TensorFlow, PyTorch

Soft Skills: Teamwork, Adaptability, Problem-Solving

WORK EXPERIENCE

CodeCelix

Feb 2026 – May 2026

Web Developer Intern (Remote)

- Built and maintained 3+ full-stack web applications using the **MERN stack**.
- Developed **REST APIs** and implemented **CRUD operations** for database-driven applications.
- Debugged and optimized applications to improve performance and user experience.
- Collaborated remotely with developers to achieve **project milestones**.
- Utilized **Git** and **GitHub** for **version control** and team collaboration.

PROJECTS

AI-Powered House Bidding Platform

2026

Technologies: MERN, Python (PyTorch, Scikit-learn)

- Developed an **AI-powered house bidding platform** using **MERN** and **Python**.
- Implemented **real-time bidding** and built project tracking and **contractor-client interaction features**.
- Created an **AI-driven 2D floor plan generator** utilizing **Random Forest** for **room area prediction** and **PyTorch-based pipelines** for **layout generation**.
- Executed **constraint-based validation** to ensure optimized, non-overlapping, and structurally feasible layouts.

Blood Donor System

2025

Technologies: React, Bootstrap, Node.js, Firebase

- Developed a **web-based platform** connecting donors, recipients, and blood banks.
- Utilized **Firebase** for **real-time data storage** and retrieval.
- Created features for **donor search**, **request handling**, and efficient **matching** between donors and recipients.

Quiz Application

2025

Technologies: React, Bootstrap, Node.js, MongoDB

- Built a full-stack quiz application with **user authentication**.
- Implemented **score tracking**, **answer validation**, and **result generation**.
- Added **quiz restart functionality** and utilized **MongoDB** for data storage.

Handwriting Recognition System

2024

Technologies: Python, TensorFlow, Scikit-learn

- Implemented a **handwriting recognition system** that identifies the writer from an image using **MobileNetV2** for feature extraction and **SVM** for classification.
- Created **image preprocessing**, **label encoding**, and a **prediction pipeline**.

EDUCATION

Bachelor of Science in Computer Science

2022 – 2026

University of Engineering and Technology (UET) Lahore, 3.186 CGPA

CERTIFICATIONS

React - The Complete Guide

Udemy
