SUMMARY

Aspiring **Full Stack Developer** with hands-on experience in **MERN stack** technologies, including **React**, **Node.js**, **Express.js**, and **MongoDB**. Passionate about building responsive and user-friendly web applications, and eager to contribute to innovative projects while driving professional growth in the technology and web development industry.

PROJECTS

AI-Powered House Bidding Platform (Final Year Project)

Technologies: MERN, Python (PyTorch, Scikit-learn)

- Built a **full-stack platform** enabling clients and contractors to interact via a **real-time bidding system** with **project progress tracking**.
- Developed an **AI-driven 2D floor plan generator** using **Random Forest** for **room area prediction** and **PyTorch-based pipelines** for **layout generation**.
- Implemented **constraint-based validation** to ensure **optimized, non-overlapping, and structurally feasible layouts**.

Blood Donor System

Technologies: React, Bootstrap, Firebase

- Developed a **web-based platform** connecting donors, recipients, and blood banks.
- Utilized **Firebase** for **real-time data storage** and retrieval.
- Created features for donor search, request handling, and efficient matching between donors and recipients.

Quiz Application

Technologies: React, Bootstrap,

- Developed an interactive quiz application using **React.js** that evaluates user responses.
- Implemented **score tracking, answer validation, and quiz restart functionality**.
- Designed a **responsive and user-friendly interface** to enhance user experience.

Handwriting Recognition System

Technologies: Python, TensorFlow, Scikit-learn

- Developed a **handwriting recognition system** that identifies the writer from an image using **MobileNetV2** for feature extraction and **SVM** for classification.
- Implemented **image preprocessing, label encoding, and a prediction pipeline**.

EDUCATION

Matric <i>Fazaia model Inter College, 85%</i>	2019 – 2020
Intermediate (Pre-Engineering) <i>Superior College of Commerce, 80%</i>	2020 – 2022
Bachelor of Science in Computer Science <i>University of Engineering and Technology (UET) Lahore, 3.2 CGPA</i>	2022 – 2026

SKILLS

ProgrammingLanguages: C++, JavaScript, Python, SQL

WebDevelopment: Bootstrap, Firebase, Node.js, React.js, Express.js, Tailwind CSS

Concepts: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP)

SoftwareDevelopmentTools: Git, GitHub, VS Code, Playwright(Basic)

MachineLearning: Scikit-learn, TensorFlow

SoftSkills: Teamwork, Adaptability, Problem-Solving

CERTIFICATIONS

React Certification

Udemy

ACHIEVEMENTS

- Demonstrated commitment and active participation in Codator's initiatives.
- Acknowledged as a valuable asset to the society for consistent efforts and services.
